- 11.18.9. application of economic, financial and tax tools supporting sustainable development (e.g. environmental tax reform) (p. 265)

11.19. Improvement of the main economic indicators (p. 265)

- 11.19.1. long-term reduction of inflation rate to the level which is close to the level of developed countries, stabilisation of monetary development, reduction of foreign indebtedness of economy of the Slovak Republic (p. 265)

- 11.19.2. improvement of trade balance and change of its structure in favour of export of modern goods and services (*p. 265*)
- 11.19.3. stable development of domestic product with a moderate tendency to growth, towards the level of the EU countries (60 percent by 2010) (*p. 265*)
- 11.19.4. creation of conditions for attracting the foreign capital to economy of the Slovak Republic and increase of volume of foreign investment (*p. 265*)
- 11.19.5. application of a fiscal policy of the state based on real incomes, reduction of fiscal deficit and reduction of debt of the state (*p. 265*)
- 11.19.6. long-term reduction of unemployment rate to the level of developed countries (*p. 265*)

11.20. Development of an integrated model of soil management (*p. 265*)

- 11.20.1. restructuring of the soil management - use of production capacity of soils and resources of landscape while respecting the environmental conditions and limits on the basis of a comprehensive soil management policy (*p. 265*)
- 11.20.2. reviving of agriculture and forestry - improvement of the main economic indicators (*p. 265*)
- 11.20.3. strategic protection of food safety - protection of production potential of soils and genetic potential of cultural plants (*p. 265*)
- 11.20.4. elaboration of a system of evaluation of non-productive functions of natural resources and its inclusion into the soil management policy (*p. 265*)
- 11.20.5. completion of process of settlement of proprietary relations to soils and land consolidation (*p. 265*)
- 11.20.6. elaboration and application of efficient measures to support alternative (organic, ecological) agriculture (*p. 265*)
- 11.20.7. support of conservation of traditional forms of agriculture in rural areas as a condition of sustainable development (*p. 265*)
- 11.20.8. long-term assurance of sufficient amount of water resources for inhabitants, elaboration of programmes of water management rationalisation (*p. 266*)
- 11.20.9. long-term assurance of sufficient amount of water resources for inhabitants, elaboration of programmes of water management rationalisation (*p. 266*)
- 11.20.10. application of sustainable water management - integrated management of river basins, diversification of water resources, de-centralisation of management (*p. 266*)

11.21. Restructuring, modernisation and recovery of the production sector (*p. 266*)

- 11.21.1. restructuring of economy of the Slovak Republic - fundamental restructuring of enterprise sphere, increasing effectiveness of bankruptcy processes, completion of process of privatisation of state enterprises (*p. 266*)
- 11.21.2. creation of conditions for restructuring of industry and modernisation of its infrastructure, transfer of work opportunities to perspective sectors (*p. 266*)
- 11.21.3. recovery and stabilisation of industrial production with orientation to perspective and modern sectors (*p. 266*)
- 11.21.4. proportionate development of production with regard to value added, export and other key indicators (*p. 266*)
- 11.21.5. diversification of import of mineral resources and reduction of relating geopolitical dependence (*p. 266*)
- 11.21.6. support of small and medium businesses as basic pillars of healthy and working economy (*p. 266*)
- 11.21.7. introduction of environmental management in enterprises, development and transfer of environmentally friendly technologies to reduce load to the environmental components (*p. 266*)
- 11.21.8. minimisation of waste production, support of closed production cycles (*p. 266*)

11.22. Improvement of the transport and technical infrastructure, development of tourism (*p. 266*)

- 11.22.1. improvement of transport - advantaging public forms of transport against individual, support of urban public transport, building sub-urban integrated systems of transport (*p. 266*)
- 11.22.2. strengthening of railway transport, reconstruction and upgrading of railway network (*p. 266*)
- 11.22.3. support of railway and combined transport of goods (freight transport) (*p. 266*)
- 11.22.4. completion of building of superior road network, improvement of accessibility of regions and marginal areas through building and maintaining the lower-level road network (*p. 266*)
- 11.22.5. complex development of telecommunications and other technical infrastructures (*p. 266*)
- 11.22.6. support of development of tourism - priority development of domestic tourism and creation of conditions for substantial growth of active foreign tourism (*p. 266*)
- 11.22.7. support of domestic small and medium entrepreneurs in the area of tourism (*p. 266*)
- 11.22.8. informatisation of the society, substantial improvement of access to modern technologies for citizens (*p. 266*)

11.23. Restructuring and modernisation of the banking sector (*p. 267*)

- 11.23.1. privatisation and recovery of banking institutions, overall stabilisation of banking sector (*p. 267*)
- 11.23.2. orientation to providing loans to small and medium entrepreneurs (*p. 267*)

11.24. Reduction of energy and resource consumption and increase of effectiveness of the Slovak economy (*p. 267*)

- 11.24.1. systematic reduction of energy demand in the national economy of the Slovak Republic, approximation to the EU countries in indicator of consumption of energy for a GDP unit (*p. 267*)
- 11.24.2. reduction of resource and energy consumption of economy of the Slovak Republic to the level of developed countries (*p. 267*)
- 11.24.3. implementation of long-term change of production and consumption patterns in interest of reduction of energy and material flows and subsequent reduction of waste amounts (*p. 267*)
- 11.24.4. application of economic tools in the area of the environment - solution of environmental debt, pollution charges, support of ecological literacy and eco-design (*p. 267*)
- 11.24.5. introduction of environmental tax reform - creation of economic environment respecting and stimulating protection of the environment, natural resources and modest consumer behaviour (*p. 267*)
- 11.24.6. stimulation of reasonably sufficient consumption of resources and goods, minimisation of energy and resource demand of production (*p. 267*)
- 11.24.7. support of growth of effectiveness of resource utilisation and orientation to closed production and consumption cycles (*p. 267*)
- 11.24.8. support of local economy, introduction of alternative economic indicators, environmental and social audit (*p. 267*)
- 11.24.9. introduction of a system of internalisation of externalities in prices of products, services and production - to include environmental and social costs in product prices (*p. 267*)
- 11.24.10. ensuring gradual removal of environmental and other internal debts from the past (*p. 267*)
- 11.24.11. support of nature-friendly approaches in utilisation of natural resources as a substitute for utilisation of nature-unfriendly technocratic and large-scale production ways of management (*p. 267*)

11.25. Reduction of share of use of non-renewable natural resources and rational use of renewable resources (*p. 267*)

- 11.25.1. ensuring environmentally sound long-term use of natural resources (to achieve maintenance or regeneration of natural resources) (*p. 267*)
- 11.25.2. harmonisation of use of non-renewable mineral resources with natural conditions and potentials of the Slovak territory and wider international relations - to carry out a new mineral resources policy of the Slovak Republic (*p. 267*)

- 11.25.3. gradual damping of use of non-renewable sources of energy and mineral resources, reduction of resource and energy inputs and losses, rational use of all kinds of energy (*p. 268*)
- 11.25.4. perspective damping of development of nuclear energy, gradual building of alternative energy sources (*p. 268*)
- 11.25.5. ensuring a substantial increase of use of renewable sources of energy - in particular geothermal and solar energy (*p. 268*)
- 11.25.6. improvement of structure of utilisation of hydropower potential through increase of share of small hydropower plants with output up to 1 MW (*p. 268*)
- 11.25.7. introduction of efficient legal instruments and creation of proper economic conditions for production of energy from renewable sources, development of support technologies (*p. 268*)
- 11.25.8. ensuring environmentally sound use of water resources and water management adjustments - integrated river basin management in relation with agricultural and forestry measures, rational use of sources in accordance with requirements of nature and landscape protection (*p. 268*)

11.26. Reduction of pollution and damaging of the environment (*p. 268*)

- 11.26.1. ensuring environmentally friendly use of substratum and relief of the Slovak territory, taking into account potentials and real hazards and risks, re-cultivation of affected areas (liquidation of old environmental loads) (*p. 268*)
- 11.26.2. improvement of air quality (reduction of emissions of pollutants) (*p. 268*)
- 11.26.3. long-term improvement of quality of water resources, creation of conditions for an overall revitalisation of the most polluted water streams (*p. 268*)
- 11.26.4. reduction of pollution of groundwater resources - increase of productivity of soils while preserving environmental criteria, reducing load to soil caused by xenobiotics (soil decontamination, re-cultivation, special system of management) (*p. 268*)
- 11.26.5. reduction of physical damage to soil (in particular the water and wind erosion) - to work out and to implement a system of soil protection against impacts of water and wind erosion (*p. 268*)
- 11.26.6. environmentally sound use of forest resources and long-term improvement of their quality (reduction of immission loads, elimination of influence of damaging factors) on the principle of sustainable forest management and use of non-productive functions (*p. 268*)
- 11.26.7. strengthening of supervision over management in forests and increase of level of management and protection (*p. 268*)
- 11.26.8. minimisation of waste production and environmentally sound waste management, recycling of wastes, secondary utilisation, minimisation of special and hazardous waste production (*p. 268*)
- 11.26.9. minimisation of occurrence of environmental risk factors threatening human health (radioactive radiation, noise and vibrations, risk substances in food chain, environmental mutagenesis, genetic manipulations, natural disasters, accidents) (*p. 268*)

11.27. Alleviation of consequences of the global climate change, depletion of the ozone layer and natural disasters (*p. 269*)

- 11.27.1. permanent monitoring and evaluation of the main macroclimatic and hydrological parameters in relation to global climate change (*p. 269*)
- 11.27.2. projection of expected results of global climate change and their hydrological consequences to sectoral policies (in particular water management, agriculture and forestry, but also other sectors and social area), practical application of measures to eliminate negative impacts (*p. 269*)
- 11.27.3. creation of an integrated system of prevention and liquidation of consequences of natural disasters (*p. 269*)

11.28. Improvement of quality of the environment in regions (*p. 269*)

- 11.28.1. use of landscape in accordance with its natural conditions (potentials) while strictly respecting its limits, application of regulators of territorial development and ensuring protection of its important values (*p. 269*)

- 11.28.2. conservation of biodiversity of nature and landscape, preferential long-term protection of valuable sites, their eco-systems and species protection "in situ" (p. 269)
- 11.28.3. building a network of protected sites, increasing quality of urban and rural landscapes with emphasis on revitalisation of endangered areas (p. 269)
- 11.28.4. conservation of landscape diversity in accordance with natural, cultural and social conditions of settlement (p. 269)
- 11.28.5. assessment of exposition of inhabitants in environmentally sensitive areas and larger settlements in order to lay down priorities of remedial measures at all levels (p. 269)
- 11.28.6. evaluation of relationship between health state of inhabitants of the Slovak Republic and negative factors of the environment, improvement of conditions for healthy life of inhabitants (p. 269)
- 11.28.7. practical application of protection of nature and landscape through regional state administration and self-governments (via application of a comprehensive environmental policy, environmental action programmes, local Agenda 21). (p. 269)

Total number of priorities: 277
